Shahrukh Azhar

Fractional Head of Design | Product, Systems & UX Strategy |
Founder @ Phoenix.Design | Ferd.AI
Dubai, United Arab Emirates

Summary

Founded and scaled a product design studio focused on SaaS, enterprise, and AI-driven platforms. Responsible for design strategy, team direction, and product experience across multiple client engagements. Key contributions:

- Led product and design system initiatives across 40+ platforms
- Defined UX architecture, workflows, and interaction models for complex products
- Built scalable design systems and component frameworks
- Worked directly with founders, executives, and product leaders
- Aligned design, product, and engineering teams
- Established AI-assisted design workflows and processes

Client domains include SaaS, F&B tech, generative AI, compliance, health tech, and enterprise software.

Experience

Phoenix.Design

Founder

September 2019 - Present (6 years 11 months)

United Arab Emirates

Phoenix.Design partners with startups and enterprises across the US, MENA, and Europe to solve complex design problems through clarity, structure, and speed.

We help founders and teams define their design north stars, build scalable systems, and deliver experiences that grow with their products.

Over the years, we've designed for more than 40 platforms spanning SaaS, F&B, retail, generative AI, edTech, compliance, and health tech.

Select collaborations include:

United States

Sendoso, Whirlpool, YMCA, Adventist Risk Management, Dealpath, and alot more.

Major contributions in MENA region.

Branding & Design Direction

AI-assisted Design Ops

Phoenix is built on the belief that good design doesn't slow teams down — it helps them move in the same direction, faster.

Ferd.AI

Founder

October 2024 - Present (1 year 10 months)

Building the next gen AI agent to streamline design ops and front-end development.

Unlayer (YC W22)

Lead Product Designer

August 2022 - January 2026 (3 years 6 months)

United Arab Emirates

Led product design initiatives across core platform experiences, including dashboard and editor workflows.

Collaborated closely with product, engineering, and design teams to improve usability, scalability, and enterprise readiness.

Key contributions:

- Drove UX improvements across dashboard and editor experiences
- Focused on enterprise user journeys and complex workflows
- Led and mentored designers across product and visual design
- Helped shape interaction patterns and product consistency
- Contributed to evolving design systems and UI frameworks
- Supported production and growth-focused design initiatives

The role blended product design, systems thinking, and cross-functional alignment.

Sendoso

Senior Product Designer

October 2019 - July 2022 (2 years 10 months)

Phoenix, AZ

Joined Sendoso during a critical growth phase, contributing to product and UX initiatives as the company scaled and secured a \$100M funding round.

Key contributions:

- Re-imagined core product workflows including touch creation, gifting, and integrations
- Simplified legacy product experiences while preserving existing user mental models
- Improved usability across complex, multi-step interaction flows
- Helped evolve the platform toward a more scalable and future-ready UX structure
- Collaborated closely with product and engineering teams on experience architecture

The role centered on redesigning foundational product experiences that supported scale, adoption, and product maturity.
